BVR Statement to PROPOSITION 65

BvR electronic GmbH
Dieselstrasse 22
85551 Kirchheim bei München

BvR electronic GmbH is a manufacturer of electronic assemblies. We are working together with global distributers of components and printed circuit boards.

The California Safe Drinking Water and Toxic Enforcement Act, better known as Proposition 65, lists approximately 900 chemicals that are known to cause cancer and/or birth defects or other reproductive harm. Proposition 65 requires manufacturers and distributors to provide a clear and reasonable warning before knowingly and intentionally exposing anyone to a listed chemical. We have to trust our distributors working conform to all applicable standards and that they always act in good faith.

BvR electronic GmbH is dedicated to providing safe products to our customers. However, as it is not feasible to test against all chemicals located on the Proposition 65 list, **BvR electronic GmbH** has decided to provide a warning based on the premise that one or more chemicals from the said list may be an ingredient in one or more of our products. Exposure to these chemicals may be under the Proposition 65 levels of concern or could be zero, but out of necessary caution, we have elected to publish this notice.

The person signing this document is authorized to sign on behalf of BvR electronic GmbH.
